## SCHOOL BUS SECURITY

**Who's at fault?**

**Maybe the school bus driver didn't stop....maybe the driver of the passenger car didn't stop!**

**Someone didn't stop! But who?**

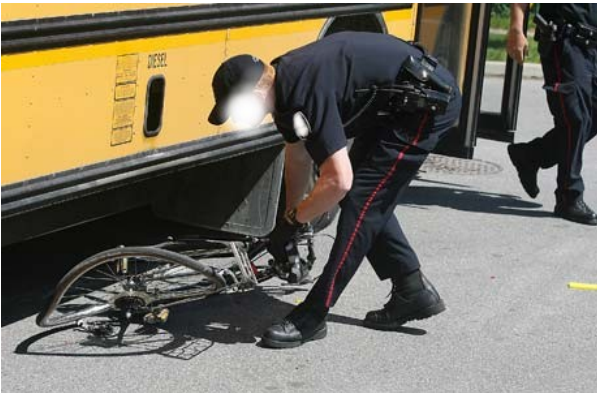

**With a Mobile Video Recording unit, you would have the answers needed to protect your assets, your drivers and your students!**

**Could this have been avoided?**

**Since 1990, 1,450 people have died as a result of school bus related accidents. 25% of them were pedestrians!**

**Adding cameras to increase the viewing area around the bus will greatly reduce the chances of your drivers killing a pedestrian or even worse .... a student!**

**Did you know?**

**School busses are ranked the #2 place for bullying. Second only to playgrounds. In recent years there has been a steady increase in violence on school busses. Not only are students inflicting harm verbally, physically, emotionally and sexually, but so are drivers. It is also becoming more common for drivers and other students to be attacked, beaten, shot or stabbed by other students on the bus.**

**With mobile video...  
It's no longer a game of "He Said...She Said"**

With over 45 years of experience in the electronics industry, why would you trust anyone else with the safety and security of your students, faculty and assets!?
